

AMENDMENTSIn the claims

Please cancel Claim 2, 3 and 10, without prejudice.

1. (Amended) A laundry detergent and/or fabric care composition comprising a polymer and a chemical entity comprising a deposition aid having a high affinity for cellulose and a benefit agent;
wherein said deposition aid is an enzyme binding domain of a material selected from the group consisting of: phospholipases, keratanases, peroxidases, gluco-amylases, amylases, xylanases, esterases, acetyl esterases, pectinases, reductases, oxidases, phenoloxidases, lipoxygenases, ligninases, pullulanases, tannases, pentosanases, chitinases, mannanases, β -glucanases, arabinosidases, arabinofuranosidases, hyaluronidases, chondroitinases, dextranases, transferases, glycosyltransferases, laccases, carbohydrases, amino acid sequences comprising a cellulose binding domain and mixtures thereof;
wherein said amino acid sequence comprising a cellulose binding domain is selected from the group consisting of: CBDs CBHII from *Trichoderma reesei*, CBDs CenC, CenA and Cex from *Cellulomonas fimi*, CBD CBHI from *Trichoderma reesei*, CBD Cellulozome from *Clostridium cellulovorans*, CBD E3 from *Thermomonospora fusca*, CBD-dimer from *Clostridium stecorarium* (NCIMB11754) XynA, CBD from *Bacillus agaradherens* (NCIMB40482), CBD family 45 from *Humicola insolens* and mixtures thereof;
and further wherein said polymer is selected from the group consisting of: soil release polymers, dispersants, anti-redeposition polymers, dye transfer inhibitor polymers, flocculants and mixtures thereof.

2. (Twice Amended) A composition according to claim 1 wherein said benefit agent is linked to said deposition aid via a linking region.

3. (Twice Amended) A composition according to claim 5 wherein said linking region is a polymer selected from the group consisting of polyethylene glycol, nucleophilic derivatives, polyethylene glycol carboxyl derivatives, polyethylene glycol electrophilically activated derivatives, polyethylene glycol sulphydryl-selective derivatives, polyethylene glycol heterofunctional derivatives, polyethylene glycol biotin derivatives, polyethylene glycol vinyl derivatives, polyethylene glycol silane derivatives, polyethylene glycol phospholipid derivatives and mixtures thereof. *Comparing*

4. (Twice Amended) A composition according to claim 1 wherein said benefit agent is linked to said deposition aid or to said linking region via a weak bond.

5. (Twice Amended) A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1, for providing sanitation and/or

Insect control comprising the step of contacting said fabric with the composition according to claim 1.

- b7f*
- 12. (Twice Amended) A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1, for providing fabric cleaning including stain/soil removal, anti-redeposition of soils and/or whiteness maintenance comprising the step of contacting said fabric with the composition according to claim 1.
 - 13. (Twice Amended) A method of treating a fabric with a composition comprising a chemical entity and a polymer according to claim 1, for providing fabric care improved fabric care including color care and/or fabric softness comprising the step of contacting said fabric with the composition according to claim 1.
